PHARMASHE

EMPOWERING WOMEN IN THE FIGHT AGAINST CANCER

Problem Statement

Problem Solution

CANCER CARE GAPS

- Lack of female-specific cancer research
- Inequities in screening and late diagnoses
- Need for personalized support and private communities

Proposed Solution

THE DUAL PHARMASHE SOLUTION

Focus 1: AI Tool

AI-Powered Research Accelerator for Researchers: Ahalyzes data for targeted female cancer drug discovery & optimized clinical trials

Focus 2: User Platform

Patient Empowerment Hub: Providing anonymous chats, weliness tracking, and verified cancer awareness resources

Methodology

INTEGRATED RESEARCH & SUPPORT PIPELINE

Steps: AI-driven data insights -> Specific drug research -> Validated patient support programs -> Community-powered outcomes

Current Stage of Development

ADVANCING INNOVATION

- AI drug discovery algorithms in validation phase
- Partnerships with major cancer centers
- Alpha platform for patient-user testing in progress

REVOLUTIONIZING CANCER CARE

Accelerated cancer research for female biology

- Earlier detections & better patient outcomes
- Empowered patients with access to global supportive networks
- Reducing the burden of cancer through awareness

INNOVATING WOMEN'S HEALTHCARE
