INDIA'S FIRST RURAL MOBILITY PLATFORM

RURBOO

Connecting Rural India, One Ride at a Time

India's first dedicated rural mobility platform — bringing reliable, affordable, and accessible transport to 600 million underserved rural Indians.

WEBSITE | USER APP | DRIVER APP

THE PROBLEM

600 Million Indians Are Transport Invisible

No Public Transport

Over 60% of rural India lacks reliable bus or rail connectivity. Villages are cut off from essential services.

Urban-First Platforms

Uber, Ola, and Rapido serve cities only. Rural demand is entirely unmet by organized mobility platforms.

Economic Isolation

Without transport, rural communities cannot access healthcare, education, markets, or employment opportunities.

OUR SOLUTION

RURBOO: Built for Rural India

RURBOO is a hyperlocal ride-hailing platform designed specifically for rural and semi-urban India. We connect passengers with local drivers — auto-rickshaws, tempos, shared jeeps, and private vehicles — through a simple, low-bandwidth app.

→ Low-Bandwidth App

Works on 2G networks and low-end smartphones

→ Local Driver Network

Onboards existing rural vehicle owners as verified drivers

→ Affordable Pricing

Transparent, fair fares tailored to rural income levels

MARKET OPPORTUNITY

A $20B+ Untapped Market

600M

Rural Population

Indians living in rural areas with no organized transport

600K+

Villages

Rural habitations across India needing last-mile connectivity

$20B

Market Size

Estimated addressable rural mobility market in India

Mover Advantage

India's first dedicated rural mobility platform

India's rural economy is growing rapidly — rising smartphone penetration, improving roads, and increasing rural incomes are creating a ready market. Government initiatives like PM Gram Sadak Yojana and Digital India are accelerating this shift.

Rural India represents the single largest untapped mobility opportunity in the world.

COMPETITIVE LANDSCAPE

We Own the Rural Lane

No organized player serves rural India. Public transport is unreliable and infrequent. Uber and Rapido are urban-only. RURBOO is purpose-built for the 60% of India that platforms ignore.

Public Transport

Irregular, overcrowded, limited routes — highest reach but lowest reliability

Uber / Ola

Urban-only, premium pricing, no rural coverage whatsoever

Rapido

City-focused bike taxis, minimal semi-urban presence

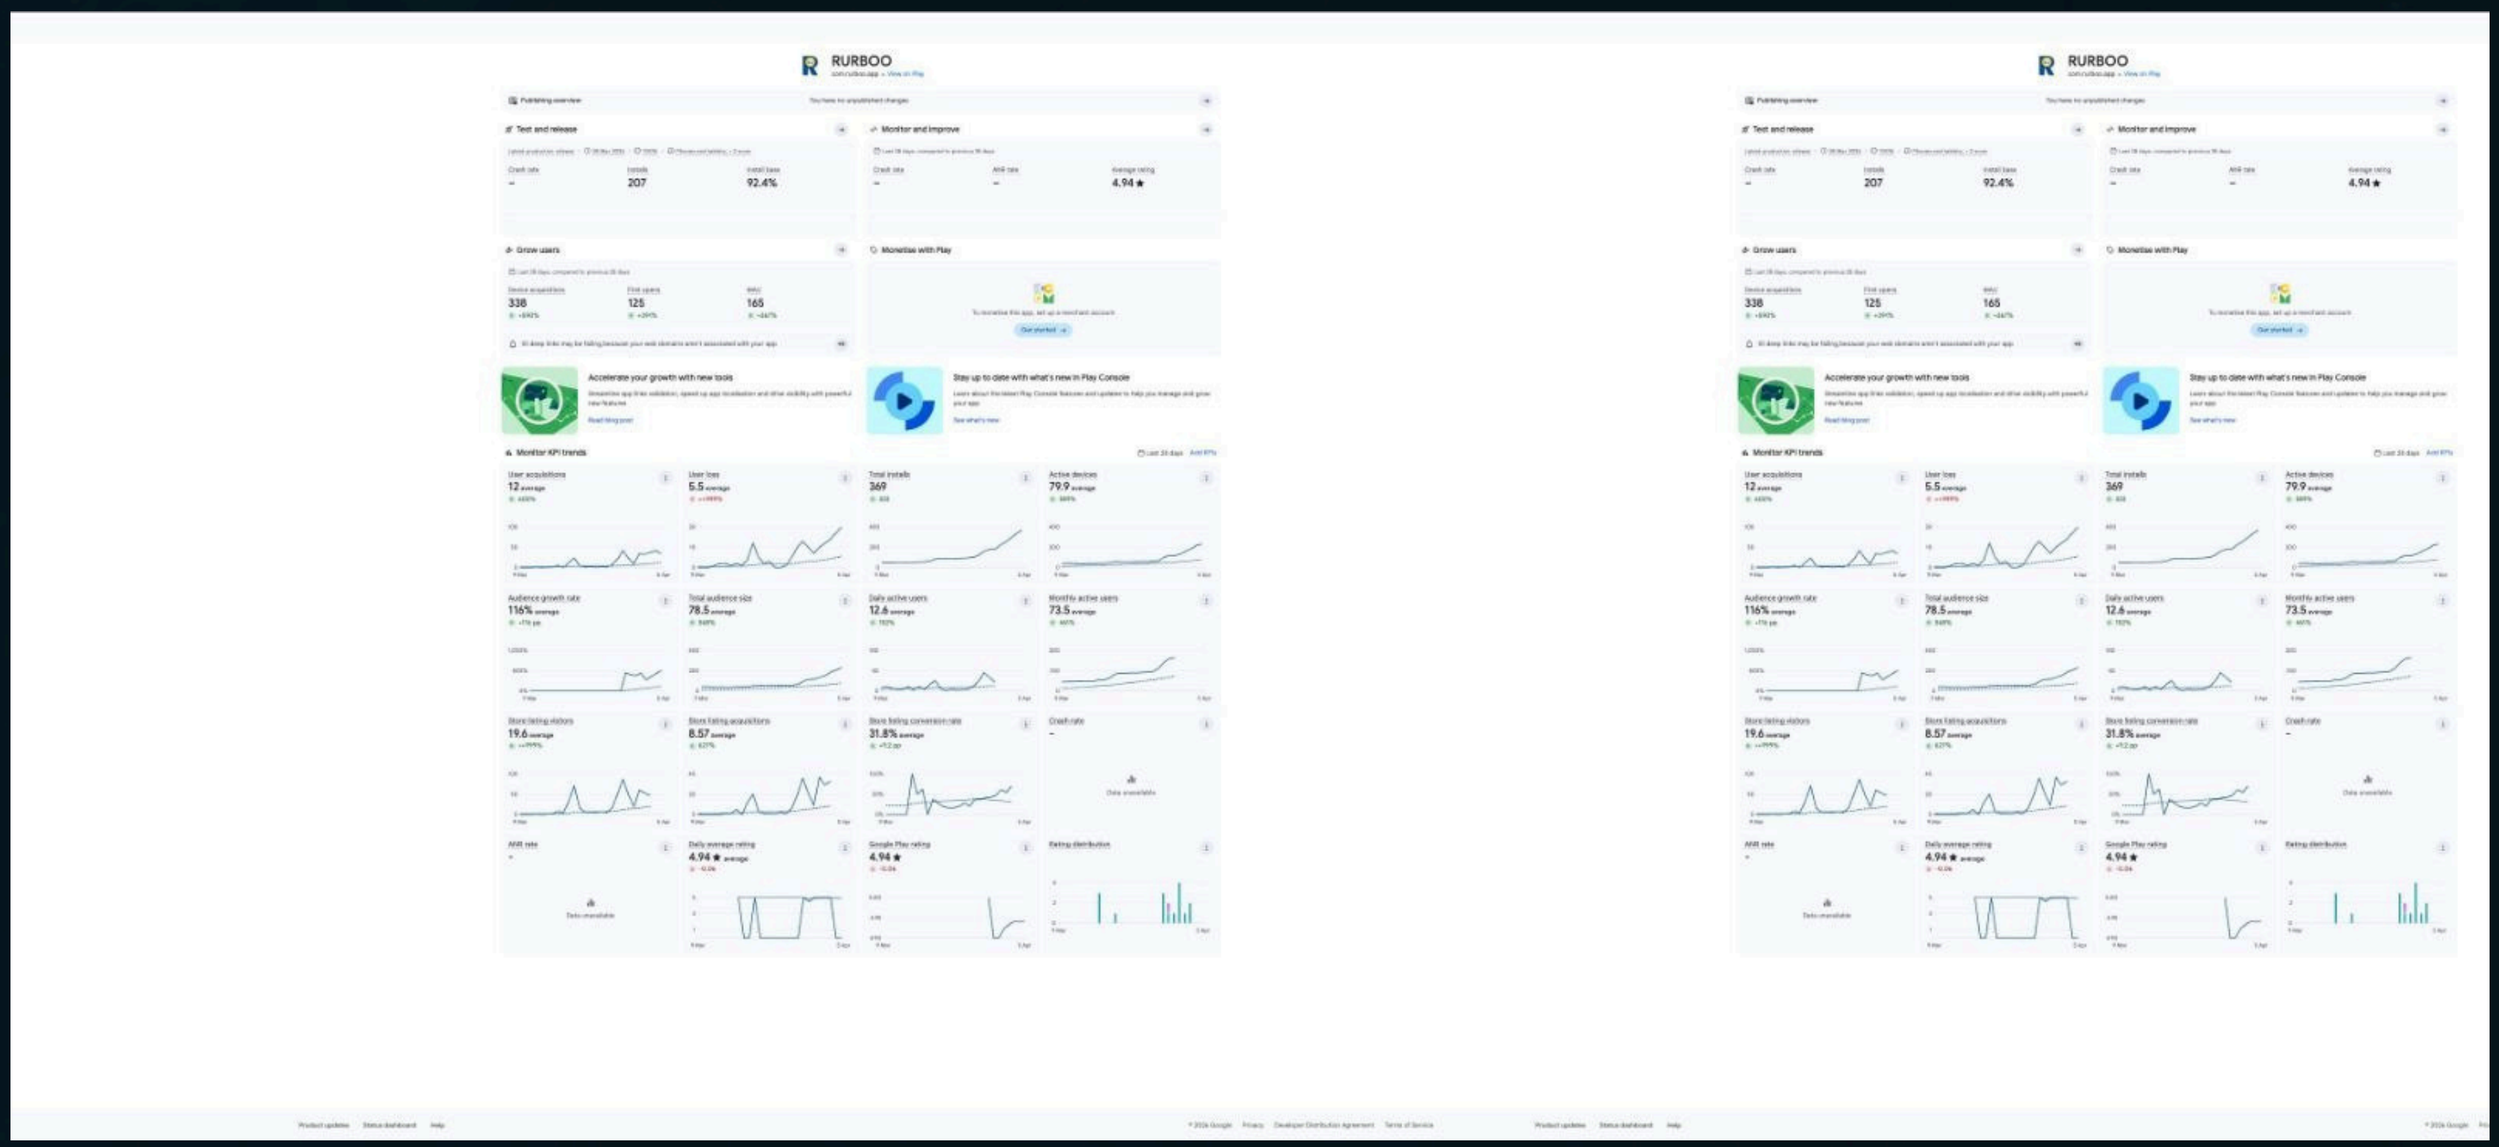

RURBOO

Rural-first, affordable, local drivers, low-bandwidth app — built for Bharat

TRACTION & KPIS

Early Momentum in Key Markets

Operations are currently live in **Unnao** and **Raebareli**, Uttar Pradesh.

RURBOO App

Installs: 369 **Device acquisitions:** 338 (+342%) **First opens:** 125 (+245%) **Monthly active users:** 73.9 avg (+407%) **Daily active users:** 12.6 avg (+152%) **Google Play rating:** 4.94 ⭐

RURBOO • HERO

Installs: 354 **Device acquisitions:** 156 **Monthly active users:** 57.3 avg **Google Play rating:** 5.9 ⭐

Live Operations

Currently active across Unnao and Raebareli, Uttar Pradesh

Signal

Strong early traction, rising engagement, and highly rated rider and driver experiences

BUSINESS MODEL

How RURBOO Makes Money

Commission Model

10–15% commission per ride — significantly lower than urban platforms, driving driver loyalty

Subscription Plans

Monthly driver subscriptions for premium features, priority listings, and analytics

Enterprise & Govt

B2B partnerships with local governments, NGOs, and rural employers for bulk mobility
